

# NIC910HPRO

# 216X Vandal-Proof Speed Dome Camera

1/4" Sony Exview HAD CCD, 18X, PTZ,  $4.1\sim73.8$ mm vari-focal lens, 560TVL, WDR, DNR mechanical (ICR) day/night, WDR, motion detection, privacy zone, OSD, IK10, IP67

The NIC910HPRO is a feature-packed speed dome camera. 216X (18X optical, 12X digital) zoom and fast panning & tilting allow pin point accuracy of even fast moving, far away objects. 560 TVL images are sharp and clear, day or night, because of day/night functionality, superior low lux performance and advanced 3D noise reduction. Particularly, it comes with image stabilizer function to reduce the influence of vibrations caused by wind or traffic. An IK10 vandal resistant bubble and IP67 water-proof housing, along with the heater and blower, make the NIC910HPRO an excellent choice for the most demanding outdoor locations.

# Superior Sensitivity

The NIC910HPRO utilizes the superior 1/4" Sony CCD to deliver a high resolution of 560 TV lines. It features MESSOA highly sensitive low-light technology. Even in ultra low light conditions, it still maintains high resolution images without blur.

#### ■ 18X Optical Zoom

18X optical zoom and 12X digital zoom make the NIC910HPRO have the capability to zoom in on an object for 216X the normal size. Images are revealed faster and clearer than ever before.

### **■ Presets and Auto Patrol**

The NIC910HPRO offers as many as 256 preset positions. It can also be programmed with 4 pattern tours, each up to 6 minutes long. Operators can set 4 sets of preset auto patrol groups for convenience of key presets surveillance.

### ■ Mechanical (ICR) Day/Night

Featuring IR Cut Filter Removable (ICR) function, the camera mechanically detect changes in lighting conditions, and then switches between color and B/W modes. It provides perfect color images at day time and crisp monochrome images at night or in very dark environment.

#### 3D Noise Reduction

Noise reduction is a powerful method for reducing image noise that produces extremely clear images even in very dim lighting conditions. Noise reduction cuts image size, reducing storage-space requirements and back-end costs.

# **■ Wide Dynamic Range**

Wide dynamic range optimizes images to ensure that dark areas are more visible while retaining details in bright areas. WDR is ideal for scenes where objects are difficult to recognize due to severe backlight or shadows. Places like bank entrances tend to be either under-lit or over-lit. A typical camera would produce an image where a person in the dark area could hardly be recognized, whereas WDR cameras produce clear details not only of the person in the foreground but also of the background.

## **■ Image Stabilizer**

Blur due to vibrations caused by wind, traffic or people is severely reduced, thus enabling a stable image. The Image Stabilizer is handy in windy environments such as on a pole or in heavy traffic areas. License plates, faces, and other objects of interest are clearly captured no matter the condition.

#### **■ Completely Vandal-Proof**

The camera is IK10-rated impact-resistant, meaning it withstands the impact of 20 Joules. It protects the camera against extreme vandalism, making it perfect for outdoor surveillance.
