Introduction

GV-VD8700 Vandal Proof IP Dome camera features cutting-edge face recognition technology that allows users to identify important personnel from its database, on the fly. Up to 10,000 face profiles can be defined in the camera's database, and also categorized to meet various corporate needs, such as facilitating customer service or security management and more. The camera's face recognition mechanism is effective for a distance of up to 4 m (13.12 ft) while able to identify up to 10 persons simultaneously. With a recognition time of within 2 seconds, it can quickly identify VIP guests and / or potential intruders. When integrated with GV-VMS, GV-VD8700's face recognition can be used to trigger alerts according to the predefined rules, thereby providing an improved, reliable security management.

As an outdoor camera, GV-VD8700 is designed with IK10 vandal resistance and IP66 ingress protection. The camera can support H.265 video codec to achieve better compression ratio while maintaining high-quality pictures at reduced network bandwidths. For night operations, the camera is equipped with an IR effective distance of up to 40 m (131.23 ft). Its WDR and Backlight Compensation allow the camera to detect faces in environments with drastic light contrast.
