Artificial intelligence

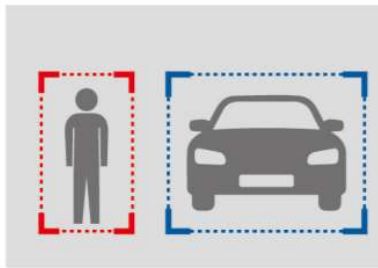

GeoVision announces the launch of **AI** series IP camera empowered by deep learning algorithms, offers detection and classification of humans and vehicles made-to-measure for the needs of surveillance.

Integrated with GeoVision Video Management Software (VMS), it supports perimeter protection, real time alert, events playback. Ideal for various installations including public buildings, warehouses, and parking.

Edge-based analytics application analyzes video for events directly on the camera offering complete flexibility and scalable solution.

Deep Learning Function

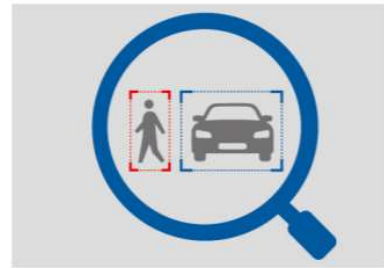

Detection & Classification
(Human & Vehicle)

AI Perimeter Protection
(Intrusion, Crossing Line
Entering Area, Leaving Area)
